2. Raffle Prize Structure (Prize amounts increase with total sales):

Prize	Winners	Prize Pool %	Example (=4,999 entries)	Example (= 5,000 entries)
First Prize	1	40%	\$10,000	\$20,000

The more participants, the bigger the prize pool and the higher the winnings!

If the total number of participants does not reach 4,999—for example, if there are 2,000 participants—the prize amounts will be proportionally reduced based on the actual sales.

Example with 2,000 Participants:

- Total Prize Pool: \$10,000
- First Prize (1 winner): \$4,000
- Second Prize (2 winners): \$1,500 each
- Third Prize (3 winners): \$1,000 each

The final prize amounts are dynamically adjusted based on the total number of entries.
